DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 01/10/2007 have been fully considered but they are not persuasive.

The Applicant contends, "US Patent No. 7,127,661) recites the use of a puncturing block in the encoding step, and further recites "interleaving the result of the repetition or puncturing according to the channel interleaver size." Neither of these two features are recited in independent claim 61 of the instant application. Hence, claim 61 can be literally infringed without literally infringing claim 43".

The Examiner disagrees and asserts that puncturing in claim 1 in US Patent No. 7,127,661 is a specific means for the rate matching in the Applicant's current claim 61; hence claim 61 is broader than claim 1 in US Patent No. 7,127,661.

The Examiner disagrees with the applicant and maintains all rejections of claims 61-65, 67 and 70-83. All amendments and arguments by the applicant have been considered. It is the Examiner's conclusion that claims 61-65, 67 and 70-83 are not patentably distinct or non-obvious over the prior art of record in view of the reference, claims 43, 45, 47, 49-55, 84 and 85 of copending Application No. 09/898,040 (now US Patent No. 7,127,661) as applied in the last office action, filed 10/11/2006. Therefore, the rejection is maintained.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 61-65, 67 and 70-83 are provisionally rejected on the ground of nonstatutory double patenting over claims 43, 45, 47, 49-55, 84 and 85 of copending Application No. 09/898,040. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

See the Non-Final Action filed 10/11/2006 for detailed action of prior rejections.

Claims 61-65, 67 and 70-83 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. US 7127661 B2.
